**PART II****SD-Routing YANG Commands 51****CHAPTER 2****Overview 53**

## Overview 54

**CHAPTER 3****Cisco SD-Routing DMVPN Yang Commands 55**

DMVPN Yang Commands	56
DMVPN IPv4 EIRGP static transport yang commands	57
DMVPN IPv4 EIGRP static tunnel yang commands	68
DMVPN IPv4 OSPF BGP crypto yang commands	79
DMVPN IPv4 OSPF BGP DHDD transport yang commands	89
DMVPN IPv4 OSPF BGP DHDD tunnel yang commands	151
DMVPN IPv4 OSPF BGP non crypto yang commands	213
DMVPN IPv4 OSPF BGP RR yang commands	270
IPv6 yang commands	328
IP4 EIGRP static IKEv1 yang commands	349
IP4 EIGRP static IKEv2 yang commands	359
IP4 EIGRP static non crypto yang commands	370

**CHAPTER 4****Cisco SD-Routing Enterprise Security SSL Proxy Yang Commands 381**

Enterprise security SSL proxy yang commands 382

---

**CHAPTER 5 Cisco SD-Routing Enterprise VXLAN B2B NAT Yang Commands 389**

Enterprise VXLAN B2B NAT yang commands 390

Enterprise VXLAN B2B NAT Catalyst 8300 yang commands 391

Enterprise VXLAN B2B NAT active yang commands 402

Enterprise VXLAN B2B NAT standby yang commands 1127

---

**CHAPTER 6 Cisco SD-Routing Secure WAN Edge Yang Commands 1911**

Secure WAN Edge Yang Commands 1912

---

**CHAPTER 7 Cisco SD-Routing Segment Routing Yang Commands 2001**

Segment Routing Yang Commands 2002

---

**CHAPTER 8 Cisco SD-Routing Service Provider L2 L3 VPN Yang Commands 2331**

Service Provider Configuration for Layer 2 and Layer 3 VPN yang commands 2332

---

**CHAPTER 9 Cisco SD-Routing Service Provider Yang Commands 2355**

Service Provider Yang Commands 2356

---

**CHAPTER 10 Cisco SD-Routing WAN AGG GETVPN Yang Commands 2711**

WAN Aggregation GETVPN Yang Commands 2712

WAN Aggregation GETVPN GM5 yang commands 2713

WAN Aggregation GETVPN GM6 yang commands 2845

WAN Aggregation GETVPN GM7 yang commands 2958

WAN Aggregation GETVPN GM10 yang commands 3046

WAN Aggregation GETVPN GM12 yang commands 3133

WAN Aggregation GETVPN KS1 yang commands 3218

WAN Aggregation GETVPN KS2 yang commands 3247

# clear sd-routing alarms

To clear alarm details such as the timestamp, event name, and severity, use the **clear sd-routing alarms** command in privileged EXEC configuration mode.

## clear sd-routing alarms

This command has no arguments or keywords

<b>Command Modes</b>	Privileged EXEC (#)
----------------------	---------------------

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	Cisco IOS XE 17.15.1a	This command was introduced.

<b>Usage Guidelines</b>	To clear the alarms, use the <b>clear sd-routing alarms</b> command in privilege EXEC Mode.
-------------------------	---

# clear sd-routing control connection-history

To erase the connection history on a SD-Routing device, use the command **clear sd-routing control connections-history** in privileged EXEC configuration mode.

## clear sd-routing control connection-history

This command has no arguments or keywords

<b>Command Modes</b>	Privileged EXEC (#)
----------------------	---------------------

<b>Command History</b>	<table><tr><th>Release</th><th>Modification</th></tr><tr><td>Cisco IOS XE 17.12.1a</td><td>This command was introduced.</td></tr></table>	Release	Modification	Cisco IOS XE 17.12.1a	This command was introduced.
Release	Modification				
Cisco IOS XE 17.12.1a	This command was introduced.				

# clear sd-routing control connections

To reset the DTLS connections from an SD-Routing device to Cisco SD-WAN Manager, use the **clear sd-routing control connections** command in privileged EXEC mode.

## clear sd-routing control connections

This command has no arguments or keywords

<b>Command Modes</b>	Privileged EXEC (#)
----------------------	---------------------

<b>Command History</b>	<table><tr><th>Release</th><th>Modification</th></tr><tr><td>Cisco IOS XE 17.12.1a</td><td>This command was introduced.</td></tr></table>	Release	Modification	Cisco IOS XE 17.12.1a	This command was introduced.
Release	Modification				
Cisco IOS XE 17.12.1a	This command was introduced.				

# clear sd-routing control port-index

To reset port-hop back to the base port on SD-Routing devices, use the **clear sd-routing control port-index** command in privileged EXEC mode.

## clear sd-routing control port-index

This command has no arguments or keywords

<b>Command Modes</b>	Privileged EXEC (#)
----------------------	---------------------

<b>Command History</b>	<table><tr><th>Release</th><th>Modification</th></tr><tr><td>Cisco IOS XE 17.12.1a</td><td>This command was introduced.</td></tr></table>	Release	Modification	Cisco IOS XE 17.12.1a	This command was introduced.
Release	Modification				
Cisco IOS XE 17.12.1a	This command was introduced.				

# clear sd-routing control reverse-proxy-connections

To clear the signed certificate installed for authentication with a reverse proxy device and reset the control connections to the reverse proxy device, use the **clear sd-routing control reverse-proxy-connections** command in privileged EXEC mode

## clear sd-routing control reverse-proxy-connections

This command has no arguments or keywords

<b>Command Modes</b>	Privileged EXEC (#)
----------------------	---------------------

Command History	Release	Modification
	Cisco IOS XE 17.12.1a	This command was introduced.

# request platform software sd-routing activate chassis-number

To activate the chassis number on a device operating in the SD-routing mode on request, use the **request platform software sd-routing activate chassis-number** command in privileged EXEC mode.

**request platform software sd-routing activate chassis-number** *chassis\_number* **token** *token\_id*

<b>Syntax Description</b>	<p><i>chassis_number</i> Activates the chassis number on the device. Specify the chassis number for activation on request.</p> <p><b>token</b><i>token_id</i> Specify the token of the chassis number for activation.</p>	
<b>Command Default</b>	Privileged EXEC (#)	
<b>Command Modes</b>		
<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

## Example

The following example shows how to activate the chassis number on the device using the **request platform software sd-routing activate chassis-number** command:

```
Device# request platform software sd-routing activate chassis-number 123 token cisco
Device#
```

# request platform software sd-routing certificate install

To install a client certificate on a device where you have enabled the SD-Routing feature, enter the **request platform software sd-routing certificate install** command in privileged EXEC mode.

**request platform software sd-routing certificate install** *path-to-certificate-file*

<b>Syntax Description</b>	<i>path-to-certificate-file</i> Specify the absolute path fo the folder to upload the generated file. You can specify any name for the folder that is created within the <i>bootflash:ctrl_mng/</i> directory.	
<b>Command Default</b>	None.	
<b>Command Modes</b>	Privileged EXEC (#)	
<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.
<b>Usage Guidelines</b>	<p>To install the client certificates for manually onboarding the SD-Routing software device, generate a Certificate Signed Request (CSR) for the device using the <b>request platform software sd-routing certificate install</b> command in privileged EXEC mode.</p> <p>The following example shows how to install a client certificate located in a VPN.</p> <pre>Device# request platform software sd-routing certificate install bootflash:ctrl_mng/test</pre>	

# request platform software sd-routing csr upload

To generate a Certificate Signed Request (CSR) for the device and upload to the specified folder, use the **request platform software sd-routing csr upload** command in privileged EXEC mode.

**request platform software sd-routing csr upload** *path-to-certificate-file*

<b>Syntax Description</b>	<i>path-to-certificate-file</i> Specify the absolute path to the folder to upload the generated file. You can specify any name for the folder that is created within the <i>bootflash:ctrl_mng/</i> directory.	
<b>Command Default</b>	None	
<b>Command Modes</b>	Privileged EXEC (#)	
<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.
<b>Usage Guidelines</b>	To install the client certificates for manually onboarding the SD-Routing software device, generate a Certificate Signed Request (CSR) for the device using the <b>request platform software sd-routing csr upload</b> command in privileged EXEC mode.	

**Note** You can use this command only when you onboard the software devices manually.

The following example shows how to generate a client certificate and upload to the specified folder.

```
Device# request platform software sd-routing csr upload bootflash:ctrl_mng/test
```

# request platform software sd-routing root-cert-chain install

To install an enterprise root certificate on a device where you have enabled the SD-Routing feature, enter the **request platform software sd-routing root-cert-chain install** command in privileged EXEC mode.

**request platform software sd-routing root-cert-chain install** *filepath-filename* [ **vpn** *rcci\_leaf* ]

<b>Syntax Description</b>	<p><i>filepath-filename</i> Install the file containing the root certificate. Specify the absolute path to the file, including the filename. The root certificate chain can be stored in one of the following locations:</p> <ul style="list-style-type: none"> <li>• <b>bootflash:</b></li> <li>• <b>crashinfo:</b></li> <li>• <b>flash:</b></li> </ul>	
	<b>vpn</b> <i>rcci_leaf</i>	Specifies the VPN in which the certificate file is located.
<b>Command Default</b>	By default, the device is equipped with Public Key Infrastructure (PKI) and Symantec-signed root certificates.	
<b>Command Modes</b>	Privileged EXEC (#)	
<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.
<b>Usage Guidelines</b>	<p>If the overlay is Cisco PKI or Symantec, you do not have to install a root certificate</p> <p>If it is an enterprise overlay, install enterprise root certificates by entering the <b>request platform software sd-routing root-cert-chain install</b> command in privileged EXEC mode.</p> <p>Ensure that you have saved the enterprise root certificate that you want to install, in one of the supported locations.</p> <p>After you have installed a root certificate, use the <b>show sd-routing control local-properties summary</b> to verify certificate installation. If installed correctly, the <code>root-ca-chain-status</code> field in the output displays value <code>Installed</code>.</p> <p>The following example shows how to install an enterprise root certificate located in a VPN.</p> <pre>Device# request platform software sd-routing root-cert-chain install bootflash:ent-root-cert-file vpn 1</pre> <pre>Device#show sd-routing control local-properties summary   personality                vedge sp-organization-name         Cisco organization-name            Cisco root-ca-chain-status          Installed root-ca-crl-status            Not-Installed  certificate-status             Installed</pre>	

certificate-validity	Valid
certificate-not-valid-before	Nov 27 08:53:44 2023 GMT

# request platform software sd-routing root-cert-chain uninstall

To uninstall an enterprise root certificate on a device where you have enabled the SD-Routing feature, enter the **request platform software sd-routing root-cert-chain uninstall** command in privileged EXEC mode.

**request platform software sd-routing root-cert-chain uninstall**

---

**Command Default****Command Modes**

Privileged EXEC (#)

---

**Command History**

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

---

**Usage Guidelines**

To uninstall an enterprise root certificate on a device, use the **request platform software sd-routing root-cert-chain uninstall** command in privileged EXEC mode.

**Example**

The following example shows how to uninstall an enterprise root certificate on a device using the **request platform software sd-routing root-cert-chain uninstall** command:

```
Device# request platform software sd-routing root-cert-chain uninstall
Successfully uninstalled the root certificate chain
```

# show sd-routing connections detail

To display detailed information about control-plane connections on a device operating in the SD-Routing mode, use the **show sd-routing connections** command in privileged EXEC mode.

## show sd-routing connections detail

### Command Modes

Privileged EXEC (#)

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify control connections from the device to Cisco vManage, Cisco vBond .

The following is sample output of the **show sd-routing connections detail** command:

Device# **show sd-routing connections detail**

```
-----
SYSTEM-IP- 172.16.255.22    PEER-PERSONALITY- vmanage

## Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was deprecated.
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.

# show sd-routing connections summary

To display information about the active control-plane connections on a device operating in the SD-Routing mode, use the **show sd-routing connections summary** command in privileged EXEC mode.

## show sd-routing connections summary

This command has no arguments or keywords.

### Command Modes

Privileged EXEC

### Usage Guidelines

When compared to the output of the **show sd-routing connections details** command, the output of **show sd-routing connections summary** command excludes detailed Tx and Rx statistics related to each control connection.

The following is sample output of the **show sd-routing connections summary** command:

Device# **show sd-routing connections summary**

PEER	PEER	PEER	PEER	SITE	LOCAL	PEER			
			PRIV	PEER		PUB

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was deprecated.

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

# show sd-routing local-properties vbond

To display vBond-related information about local control properties of WAN interfaces in the SD routing mode, use the **show sd-routing local-properties vbond** command in privileged EXEC mode.

## show sd-routing local-properties vbond

### Command Modes

Privileged EXEC (#)

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the vBond information about local control properties of WAN interfaces.

### Example

The following is sample output of the **show sd-routing local-properties vbond** command:

```
Device# show sd-routing local-properties vbond
  INDEX      IP                                PORT
-----
0           10.0.12.26                        12346
1           2001:a0:c::1a                     12346
```

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command is deprecated .
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

# show sd-routing local-properties wan detail

To display detailed information about local control properties of WAN interfaces in the SD routing mode use the **show sd-routing local-properties wan detail** command in privileged EXEC mode.

## show sd-routing local-properties wan detail

### Command Modes

Privileged EXEC (#)

### Usage Guidelines

The NAT type information is displayed only when two or more vBonds are configured.

### Example

The following is sample output of the **show sd-routing local-properties wan detail** command:

```
Device# show sd-routing local-properties wan detail
NAT Type: E -- indicates End-point independent mapping
          A -- indicates Address-port dependent mapping
          N -- indicates Not learned
          Note: Requires minimum two vbonds to learn the NAT type

Interface GigabitEthernet1
  Public  IPv4      : 50.0.1.14
  Public  Port      : 65104
  Private IPv4      : 50.0.1.14
  Private IPv6      : 2001:320:1::e
  Private Port      : 65104
  State    : up
  Number of vManages : 1
  Control   : yes
  STUN      : no
  Low Bandwidth Link : no
  Last Connection  : 0:05:23:05
  SPI Remaining Time : 0:00:00:00
  NAT Type    : N
  vManage Connection : 5
  Region IDs   : 0
```

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was deprecated .

# show sd-routing local-properties wan ipv4

To display IPv4 related information about local control properties of WAN interfaces in the SD routing mode use the **show sd-routing local-properties wan ipv4** command in privileged EXEC mode.

**show sd-routing local-properties wan ipv4**

## Command Modes

Privileged EXEC (#)

## Usage Guidelines

### Example

The following is sample output of the **show sd-routing local-properties wan ipv4** command:

```
Device# show sd-routing local-properties wan ipv4
  PUBLIC          PUBLIC  PRIVATE          PRIVATE
INTERFACE                                IPv4             PORT             IPv4             PORT             STATE
-----
GigabitEthernet1          50.0.1.14        65314            50.0.1.14        65314            up
```

## Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was deprecated .
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

# show sd-routing local-properties wan ipv6

To display IPv6 related information about local control properties of WAN interfaces in the SD routing mode use the **show sd-routing local-properties wan ipv6** command in privileged EXEC mode.

## show sd-routing local-properties wan ipv6

### Command Modes

Privileged EXEC (#)

### Usage Guidelines

#### Example

The following is sample output of the **show sd-routing local-properties wan ipv6** command:

```
Device# show sd-routing local-properties wan ipv6
                                     PUBLIC  PRIVATE
INTERFACE                           PORT   IPv6
STATE
-----
GigabitEthernet1                   65314   2001:320:1::e
up                                     65314
```

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was deprecated.
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

# show sd-routing alarms detail

To view detailed information about the SD-Routing alarm, use the **show sd-routing alarms detail** command in privileged EXEC configuration mode.

## show sd-routing alarms detail

This command has no arguments or keywords.

<b>Command Modes</b>	Privileged EXEC (#)
----------------------	---------------------

<b>Command History</b>	<table><thead><tr><th>Release</th><th>Modification</th></tr></thead><tbody><tr><td>Cisco IOS XE 17.15.1a</td><td>This command was introduced.</td></tr></tbody></table>	Release	Modification	Cisco IOS XE 17.15.1a	This command was introduced.

# show sd-routing certificate reverse proxy

To display the signed certificate installed on a SD-Routing device for Authentication with Reverse Proxy, use the **show sd-routing certificate reverse-proxy** command in privileged EXEC mode.

**show sd-routing certificate reverse-proxy**

## Command Modes

Privileged EXEC (#)

## Command History

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.

## Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the signed certificate installed on a SD-Routing device for Authentication with Reverse Proxy.

The following is sample output of the **show sd-routing certificate reverse-proxy** command:

# show sd-routing certificate root-ca-cert

To display the root CS certificate installed on a device operating in the SD-Routing mode, use the **show sd-routing certificate root-ca-cert** command in privileged EXEC mode.

## show sd-routing certificate root-ca-cert

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Routers .

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the root CA certificated installed on the device.

The following is sample output of the **show sd-routing certificate root-ca-cert** command:

```
Device#show sd-routing certificate root-ca-cert

# show sd-routing certificate root-ca-crl

To display the root certificate revocation list on a device operating in the SD-Routing mode, use the **show sd-routing certificate root-ca-crl** command in privileged EXEC mode.

**show sd-routing certificate root-ca-crl**

## Command Modes

Privileged EXEC (#)

## Command History

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.

## Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the list of root certificated revoked on the device .

The following is sample output of the **show sd-routing certificate root-ca-crl** command:

# show sd-routing certificate serial

To display the chasis and serial numbers of the certificate installed on a SD-Routing device for Authentication with Reverse Proxy, use the **show sd-routing certificate serial** command in privileged EXEC mode.

## show sd-routing certificate serial

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the chasis and serial numbers of the certificate installed on a SD-Routing device for Authentication with Reverse Proxy.

The following is sample output of the **show sd-routing certificate serial** command:

```
Device# show sd-routing certificate serial
Chassis number: C8K-9bdc48d2-4987-4d49-8f28-e62e72900628 serial number: 1234570D Subject
S/N: N/A
```

# show sd-routing certificate signing-request

To display information about certificate signing request (CSR) installed on devices in the SD-Routing mode, enter the **show sd-routing certificate signing-request** command in privileged EXEC mode.

**show sd-routing certificate signing-request** [ **decoded** ]

<b>Syntax Description</b>	<b>decoded</b> Display decoded certificate signing-request.

# show sd-routing certificate validity

To display information about the validity of the certificate in the SD-Routing mode, enter the **show sd-routing certificate validity** command in privileged EXEC mode.

## show sd-routing certificate validity

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the validity of the certificate installed on the device .

The following is sample output of the **show sd-routing certificate validity** command:

```
Device# show sd-routing certificate validity
The certificate is valid from Nov 27 08:53:44 2023 GMT (Current date is Tue Nov 28 05:33:51
GMT 2023) & valid until Nov 26 08:53:44 2024 GMT
```

# show sd-routing control connections detail

To display detailed information about control-plane connections on a device operating in the SD-Routing mode, use the **show sd-routing control connections** command in privileged EXEC mode.

## show sd-routing control connections detail

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, and Cisco 1000 Series Integrated Services Routers.

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify control connections from the device to Cisco vManage, Cisco vBond, <any other components? > .

The following is sample output of the **show sd-routing control connections detail** command:

```
Device# show sd-routing control connections detail

# show sd-routing control local-properties vbond

To display vBond-related information about local control properties of WAN interfaces in the SD routing mode, use the **show sd-routing control local-properties vbond** command in privileged EXEC mode.

## show sd-routing control local-properties vbond

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the vBond information about local control properties of WAN interfaces.

### Example

The following is sample output of the **show sd-routing control local-properties vbond** command:

```
Device# show sd-routing control local-properties vbond
  INDEX      IP                               PORT
-----
0           10.0.12.26                        12346
1           2001:a0:c::1a                     12346
```

# show sd-routing control local-properties wan detail

To display detailed information about local control properties of WAN interfaces in the SD routing mode use the **show sd-routing control local-properties wan detail** command in privileged EXEC mode.

## show sd-routing control local-properties wan detail

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

### Usage Guidelines

The NAT type information is displayed only when two or more vBonds are configured.

### Example

The following is sample output of the **show sd-routing control local-properties wan detail** command:

```
Device# show sd-routing control local-properties wan detail
NAT Type: E -- indicates End-point independent mapping
          A -- indicates Address-port dependent mapping
          N -- indicates Not learned
Note: Requires minimum two vbonds to learn the NAT type

Interface GigabitEthernet1
  Public  IPv4      : 50.0.1.14
  Public  Port      : 65104
  Private IPv4      : 50.0.1.14
  Private IPv6      : 2001:320:1::e
  Private Port      : 65104
  State      : up
  Number of vManages : 1
  Control     : yes
  STUN        : no
  Low Bandwidth Link : no
  Last Connection  : 0:05:23:05
  SPI Remaining Time : 0:00:00:00
  NAT Type      : N
  vManage Connection : 5
  Region IDs     : 0
```

# show sd-routing control local-properties wan ipv4

To display IPv4 related information about local control properties of WAN interfaces in the SD routing mode use the **show sd-routing control local-properties wan ipv4** command in privileged EXEC mode.

**show sd-routing control local-properties wan ipv6**

## Command Modes

Privileged EXEC (#)

## Command History

Release	Modification
Cisco IOS XE 17.4.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

## Usage Guidelines

### Example

The following is sample output of the **show sd-routing control local-properties wan ipv4** command:

```
Device# show sd-routing control local-properties wan ipv6
```

PUBLIC INTERFACE	PUBLIC IPv4	PRIVATE PORT	PRIVATE IPv4	PORT	STATE
GigabitEthernet1	50.0.1.14	65314	50.0.1.14	65314	up

# show sd-routing control local-properties wan ipv6

To display IPv6 related information about local control properties of WAN interfaces in the SD routing mode use the **show sd-routing control local-properties wan ipv6** command in privileged EXEC mode.

**show sd-routing control local-properties wan ipv6**

## Command Modes

Privileged EXEC (#)

## Command History

Release	Modification
Cisco IOS XE 17.14.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

## Usage Guidelines

### Example

The following is sample output of the **show sd-routing control local-properties wan ipv6** command:

```
Device# show sd-routing control local-properties wan ipv6
                                     PUBLIC  PRIVATE
INTERFACE                          PORT    IPv6
STATE
-----
GigabitEthernet1                   65314   2001:320:1::e
up                                  65314
```

# show sd-routing system status

To display the system status information of WAN interfaces in the SD routing mode, use the **show sd-routing system status** command in privileged EXEC mode.

## show sd-routing system status

### Command Modes

Privileged EXEC (#)

### Command History

Release	Modification
Cisco IOS XE 17.12.1a	This command was introduced on Cisco Catalyst 8200, 8300, and 8500 Series Edge Platforms, Cisco Catalyst 8000V Edge Software, Cisco 4000 Series Integrated Services Routers, Cisco 1000 Series Integrated Services Routers, and Cisco ASR 1000 Series Aggregation Services Router .

### Usage Guidelines

You can use this command when you are onboarding a device. The output helps you verify the status of a device.

### Example

The following is sample output of the **show sd-routing system status** command:

```
Device# show sd-routing system status

# Overview

The traditional way of managing network devices is by using Command Line Interfaces (CLIs) for configurational (configuration commands) and operational data (show commands). Cisco IOS XE supports the Yet Another Next Generation (YANG) data modeling language. YANG can be used with the Network Configuration Protocol (NETCONF) to provide the desired solution of automated and programmable network operations. The YANG models allow you to configure and monitor the SD-Routing devices using Configuration Group. A configuration group is a logical grouping of features or configurations that can be applied to one or more devices in the network managed by Cisco SD-WAN Manager. You can define and customize this grouping based on your business needs. The YANG models provide various commands for configuring and monitoring the hardware and network connectivity.

The YANG commands included in this document are a sub-set of the complete list of IOS XE YANG commands. These commands are validated on SD-Routing devices on the SD-WAN manager for different solutions. For a complete list of YANG commands, see <https://github.com/YangModels/yang/tree/main/vendor/cisco/xe/17161>.

---

**Note** The commands that have not been converted to YANG models can be used through the classic CLI parcel for configuration.

---

## Cisco SD-Routing DMVPN Yang Commands
